Office Action Summary	Application No. 10/600,701	Applicant(s) HILL, RICHARD NEWTON	
	Examiner Charles G. Freay	Art Unit 3746	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on March 6, 2006 (personal interview).
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

The examiner notes that this office action is in response to the specification, claims and drawings as presented in the paper of June 30, 2004.

Election/Restrictions

Applicant's election without traverse of species 1 (Fig. 4) from species set 1, species 1 (Fig. 7) from species set 2 and species 1 from species set 3 (pumping water to a reservoir or levied area for sea farming) during the interview of March 6, 2006 is acknowledged.

The examiner noted during the interview that this election would constitute a full response to the restriction requirement of February 8, 2006.

Drawings

The drawings are objected to because the figures should be labeled by titles such as "Figure 1", "Figure 2", etc.. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

Art Unit: 3746

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: in the "Brief Description of the Drawings" section the figures should be referred to by language such as "Fig. 1 shows the ..." instead of "Sheet 1 of 10 shows the...".

Appropriate correction is required.

Claim Objections

Claims 4-21 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to the claims from which it depends in alternative form. See MPEP § 608.01(n). Accordingly, the claims 4-21 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Villanueva et al (USPN 4,249,084).

Villanueva et al discloses a wave actuated power producing pump having a buoy (1 and also the multiple alternative arrangements shown in Fig. 15), which is driven by wave action (see Fig. 1) to pump water through a pipe line (29) to a power generation plant (19 in Figs. 1 and 2). The water is then directed to remote reservoir (25A at the top

of a mountain) where it could be used for a number of well known uses such as irrigation). As shown in Fig. 14 a number of such devices may be employed for increased effect.

Conclusion

The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The examiner has included a number of references which seem to disclose all features of the applicants wave actuated pump structure in various parts. The applicant is encouraged to review these references for what they teach one of ordinary skill in the art. In the event that the applicant decides to continue prosecution, the examiner would also suggest reviewing these applications and the form and structure of their claims. Particular attention should be paid to the way in which the claims of these patents use descriptive terminology to particularly point out the structural features of the various pumps. Cited references to: Berg, Marx, Dilliner, Windle, Anderson, Shaffer, Lindner et al, Crausbay, Meano.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles G. Freay whose telephone number is 571-272-4827. The examiner can normally be reached on Monday through Friday 8:30 A.M. to 5:30 P.M..
